

OBJECTIVE

Results-driven Vue.js developer with one year of hands-on experience seeking a challenging position to leverage and further enhance my expertise in front-end development. Proficient in building responsive and intuitive user interfaces, I aim to contribute to innovative projects while continuously expanding my skill set in a dynamic team environment. Eager to collaborate with talented professionals to deliver high-quality solutions that exceed client expectations.

Kongu Engineering College Jul 2018 – Jun 2022	B.E Mechanical Engineering
St Lucy's Matric Hr Sec school(HSC) Jun 2017 – Apr 2018	HSC
St Lucy's Matric Hr Sec school(SSLC) Jun 2015 – Apr 2016	SSLC

WORK EXPERIENCE

UniQin.ai Jul 2023 – Present	<div>Software Developer</div> <p>Over the past year, I've honed my skills as a front-end developer with a focus on Vue.js and related technologies. With a solid foundation in HTML, CSS, and Tailwind CSS, I've successfully translated design mockups into elegant and responsive user interfaces.</p> <p>My proficiency in JavaScript allowed me to grasp Vue.js quickly, enabling me to build dynamic and interactive web applications. Additionally, I've leveraged the Quasar framework to expedite development and ensure consistency across projects. One of my key strengths lies in API integration, where I've seamlessly connected front-end interfaces with back-end systems to fetch and display data, enhancing user experiences.</p> <p>This experience has equipped me with a deep understanding of RESTful principles and best practices. Currently, I'm expanding my skill set by learning React.js, demonstrating my commitment to staying updated with industry trends and technologies. With a solid foundation and a passion for continuous learning, I'm eager to tackle new challenges and contribute effectively to innovative projects.</p>

PROJECTS

Oct 2023 – Jan 2024	<div>Sign Up Flow</div> <p>Dedicated and results-oriented professional with one year of experience specializing in optimizing sign-up flows for UniQin.ai. Proficient in analyzing user behavior, identifying pain points, and implementing solutions to enhance user experience and drive conversion rates. Demonstrated ability to collaborate cross-functionally</p>
---------------------	---

and leverage data-driven insights to inform decision-making processes. Seeking opportunities to further contribute to the success of innovative projects within a dynamic team environment.

Jul 2023 – Sep 2023

E-commerce Website

I actively participated in the development of e-commerce project pages over the course of one month, contributing to various aspects such as design implementation, content optimization, and user experience enhancements. Throughout this project, I collaborated closely with the team to ensure timely delivery and adherence to project goals. Demonstrating my ability to effectively contribute to the project's success within a limited timeframe.

Apr 2024 – May 2024

Web App

Developed a dynamic and visually appealing website using the Framer no-code platform. Leveraged Framer's intuitive design tools and components to create responsive layouts and interactive features. Implemented seamless navigation and engaging animations to enhance user experience. Collaborated with designers to ensure the website aligned with brand guidelines and optimized for performance across various devices.

Mar 2024 – Mar 2024

Portfolio

Using React.js and Tailwind CSS for your portfolio offers a dynamic, responsive, and efficient way to showcase your work. React.js enables component-based organization and interactivity, while Tailwind CSS simplifies styling with its utility classes, speeding up development and ensuring consistency. Together, they help create a modern and visually appealing portfolio with minimal effort.
